## Chapter 1. Household Income

### Household Income Trends

The richest 20 percent of households control half the nation's income . . . . .	8
One in five households has an income of \$100,000 or more . . . . .	10
Householders aged 55 or older are the only ones who have made gains since 2000 . . . . .	16
Men who live alone lost the most between 2000 and 2008 . . . . .	18
Every racial and ethnic group lost ground between 2000 and 2008 . . . . .	20
Income has declined across the board. . . . .	22
Five-person households experienced the biggest income decline . . . . .	24
Incomes of households with two earners are still rising . . . . .	26
Among married couples, those with children have lost ground . . . . .	28
Dual-earner couples are faring better than single-earner couples. . . . .	30
The Northeast experienced the smallest decline in median household income . . . . .	32
North Dakota is the biggest gainer, Missouri the biggest loser . . . . .	34

### Household Income, 2005

The more earners in a household, the higher the income . . . . .	38
Women who live alone have the lowest incomes . . . . .	44
Incomes are lowest for the oldest householders . . . . .	50
Asian married couples have the highest incomes . . . . .	56
Incomes peak in middle age for female-headed families . . . . .	62
Among male-headed families, Asians have the highest incomes . . . . .	68
Among women who live alone, those aged 25 to 44 have the highest incomes . . . . .	74
Among men who live alone, incomes peak in the 35-to-44 age group . . . . .	80
Households with three or more earners have the highest incomes . . . . .	86
Couples with school-aged children are the most affluent . . . . .	92
Single-earner couples have much lower incomes. . . . .	98
Female-headed families with children have low incomes . . . . .	102
Incomes vary for male-headed families . . . . .	108
Education boosts income . . . . .	114
Incomes are lowest in the South . . . . .	120
Among households in the South, blacks have the lowest incomes . . . . .	126
Median income gap between top and bottom states is enormous . . . . .	131
Nonmetropolitan households have the lowest incomes . . . . .	134

## Chapter 2. Men's Income

### Men's Income Trends

The median income of men aged 65 or older grew between 2000 and 2008 . . . . .	142
Hispanic men lost the least between 2000 and 2008 . . . . .	144
Since 2000, men's incomes fell the most in the Midwest. . . . .	150
Men who work full-time, year-round are struggling to stay even . . . . .	152
Among men with full-time jobs, Hispanics earn the least . . . . .	154
Between 2000 and 2008, even the college-educated lost ground . . . . .	156
The recession is hurting most, but some more than others. . . . .	158

<b>Men's Incomes, 2008</b>	
Among men who work full-time, incomes are high well into old age	162
Men's income is highest in the Northeast	169
Men in nonmetropolitan areas have the lowest incomes	175
Most men earn less than \$50,000 per year	177
A college diploma adds to earning power	183
Among the college-educated, non-Hispanic white men earn the most	190
Career choice affects earnings	195
Wage and salary income is most common	198
<b>Chapter 3. Women's Income</b>	205
<b>Women's Income Trends</b>	
Women's median income declined in most age groups between 2000 and 2008	208
Hispanic women experienced the biggest income gain between 2000 and 2008	210
Between 2000 and 2008, women's median income grew the least in the Midwest	216
Among women with full-time jobs, earnings grew between 2000 and 2008	218
Among women with full-time jobs, earnings are growing faster for Asians than for anyone else	220
Earnings have fallen for most women, regardless of their educational level	222
Women's fortunes vary by occupation	224
Men's and women's earnings have become more alike	226
A growing percentage of wives are earning more than their husbands	228
<b>Women's Incomes, 2005</b>	
Among women who work full-time, incomes peak in the middle and older age groups	232
Women's median income tops \$40,000 in the Northeast	239
Women in the suburbs have the highest incomes	245
Among women working full-time, Asians have the highest median earnings	247
Women's earnings rise with education	253
Among women with a bachelor's degree, Hispanics earn the least	260
Women's earnings vary by occupation	265
Few women receive retirement income	268
<b>Chapter 4. Discretionary Income</b>	
Discretionary income peaks in the 45-to-54 age group	280
Discretionary income rises with income	282
People who live alone have as much discretionary income per capita as married couples with children	284
Hispanic households have the smallest amount of discretionary income	286
The South controls the largest share of discretionary income	288
Discretionary income rises steadily with education	290
<b>Chapter 5. Wealth</b>	
Net worth has fallen since reaching a peak in 2007	294
Homes, businesses, and retirement accounts are the three most important assets	296
Retirement accounts are modest, even among those approaching retirement age	298
Stock ownership peaks in the 45-to-64 age group	302
Median housing value peaks in the 45-to-54 age group	305
Home-secured debt accounts for the largest amount owed	309

Highly paid workers are more likely to have access to a retirement plan at work . . . . .	313
Few workers have saved more than \$100,000 . . . . .	318
<b>Chapter 6. Poverty</b> . . . . .	<b>321</b>
<b>Poverty Trends</b>	
Married couples head a smaller share of poor families . . . . .	324
Family poverty has grown among blacks, Hispanics, and non-Hispanic whites since 2000 . . . . .	326
Poverty has declined among female-headed families with children . . . . .	332
The poverty rate is higher, but still below the 1990 level . . . . .	338
The poverty rate for older Americans has declined . . . . .	340
Poverty rate has declined sharply among blacks . . . . .	343
Nearly one in four poor Americans lives in the West . . . . .	346
Only 10 percent of naturalized citizens are poor . . . . .	349
In 2008, New Mexico had the highest poverty rate and New Hampshire had the lowest . . . . .	351
The suburbs of metropolitan areas are home to a growing share of the poor . . . . .	356
The number of poor with full-time jobs has grown . . . . .	359
<b>Poverty, 2008</b>	
Poverty is less likely for families with two or more workers . . . . .	362
In the West, Hispanic families are most likely to be poor . . . . .	367
The poverty rate peaks among black female-headed families with children in nonmetropolitan areas . . . . .	376
Non-Hispanic whites account for the majority of poor people aged 65 or older . . . . .	385
Poverty rates are highest among children . . . . .	387
People who live alone or with nonrelatives account for a large share of the poor . . . . .	393
Poverty rate declines as education increases . . . . .	404
Among black and Hispanic workers, more than 1 in 10 are poor . . . . .	406
Many of the poor are too sick to work . . . . .	412
Fourteen percent of Southerners live in poverty . . . . .	414
Poverty rate is highest in the principal cities . . . . .	417
The majority of poor Americans live in just eight states . . . . .	420
